Subject: USPS entering mailbox services industry

I am writing this letter on behalf of my 2 store locations, and the unfair advantage the postal service will have over competing businesses already in this environment. This process of unfair business advantage continues with the USPS and is allowed by our congress and the postal commission. The UPS Stores have to charge to sales tax to our customers while the USPS has a 6-7% price advantage due to the fact that they are not required to charge a sales tax. No wonder our government is in a \$16 trillion dollar hole. Once again, the USPS is being allowed to enter a market with unfair advantage against real business owners that are subjected to all of the competitive disadvantages in the real business world. When is going to end?? The dissent will continue to grow louder, and you must stop this from happening. This will be in direct conflict with thousands of small business owners across the nation.
